## WORK EXPERIENCE

### Optimal Health Solutions Pvt. Ltd (Medplus).

Hyderabad , India

Associate Software Engineer

Sep 2022 - Present

- Collaborated effectively with cross-functional teams to integrate backend APIs in Java and develop user-friendly frontend pages.
- Improved transaction processing speed by 12% through Java optimizations and integration of Solr and Redis for data retrieval and caching.
- Optimized MySQL queries, improving data retrieval efficiency by 20%
- Applied strong analytical and debugging skills to resolve complex issues and minimize system downtime
- Managed CI/CD pipelines using Jenkins, automating project builds, testing, and deployments.
- Led data migration initiatives using SQL scripts, ensuring seamless transfer of data between systems while maintaining data integrity and optimizing performance.

## PROJECT EXPERIENCE

### Medplus Finance ERP

Hyderabad

**Technoloies :** Java,React JS,Mysql,Solr,Redis

Sep 2022 - Dec 2023

- In my role on this Finance ERP project, I leveraged my full-stack development skills to build and maintain the system.
- This included designing data access layers (DAO), along with developing and optimizing SQL queries and developing business logic services (Services) to automate the processes.
- Developed RESTful APIs or other interfaces to handle user requests.
- Also i was responsible for Implement client-side functionalities to handle API requests and responses effectively.
- Design and develop user interfaces using React JS in specific section for creating a response screen.
- Collaborated across teams to seamlessly integrate frontend and backend components, using Agile methodologies for rigorous testing and maintaining high standards for code quality, performance, security, and application optimization with QA support.

### Medplus Lens

Hyderabad

**Technologies :** MySQL, HTML,CSS,Java Script,Java

- **Link :** <https://www.medpluslens.com/home>
- Developed user authentication and authorization mechanisms, ensuring reduced login failure rate by 5% by implementing improved error handling.
- Reduced user registration time by 10% through optimization of registration form validation.
- Worked with UX/UI designers, and QA testers to ensure seamless integration and functionality
- In Medplus Lens project , i was not only responsible for Designing secure registration and login functionalities (HTML/CSS/JavaScript) but also for backend API implementations.

### User Management System

Hyderabad

**Technologies :** Angular 8, Java,MySQL

- Implemented Solr-based data fetching system that improved working efficiency by 15% through faster and more accurate data retrieval and processing.
- Designed and developed few new user interface screen that streamlined the selection of process owners, enabled efficient downloading using multiple selected factors , and facilitated seamless data uploading, enhancing workflow efficiency.

- Ensured timely updates and enhancements to projects in response to client needs / raised tickets , ensuring alignment with their requirements and maintaining high satisfaction levels.

## EDUCATION

---

**SREE VISVESVARAYA INSTITUTE OF TECH AND SCIENCE**

**Mahaboob Nagar,India**

Bachelor of Technology - Computer Science and Engineering

*Graduation Date: Jul 2022*

## SKILLS & INTERESTS

---

**SKILLS:** Microsoft Office (Excel, Word, PowerPoint) , JAVA , C , C++ , Core Python , HTML , CSS , Java Script (React JS) , Solr ,Redis , Postman , Jenkins

**INTERESTS:** Coding , Reading , Cooking

## ACHIEVEMENTS

---

- BEST STUDENT AWARD - TELANGANA , 2016
- GRADUATED WITH HIGHEST HONOUR , Ranking First in Class
- AWARDED 1st place in Technical Paper Presentation on at SVITS College.
